Our Mission

Melody Ouyang's Piano Studio is committed to provide the best piano education for all ages and levels. We are dedicated to help you develop total musicianship, understand, and love music that will last for a lifetime.

What we offer

Melody Ouyang's Piano Studio offers exceptional private piano lessons for 4 1/2 year-olds to adults. Our studio is located in Frisco, Texas, and we are serving all surrounding areas.

Are All Piano Studios The Same?

Here are some of our studio highlights that set us apart from other piano studios.

- Our teachers are not only university trained, they have also gone through extensive pedagogical trainings and share the same high standard of teaching philosophies as our director, Dr. Melody Ouyang, a critically acclaimed performer and music educator. We believe only true musicians understand what it takes to teach music.
- Our studio is located at a free-standing building, a professional space built specifically for teaching piano lessons; free of pets and household noises.
- We teach total musicianship. Our students learn much more than just playing the notes correctly. All our students not only have solid techniques, but they also learn theory and all aspects of music. Because of our unique lesson structures, our students understand and love music. And for the same reason, there is no additional fee for theory and ear-training.
- We keep our students motivated by providing opportunities for all activities including 2 recitals per year at a professional facility. Our students participate in Texas state theory exams, festivals and competitions. And most importantly, we do not force students to participate in activities that they do not feel comfortable.
