

CYBERSECURITY AWARENESS MONTH

National Cybersecurity Awareness Month (NCSAM), launched in October 2004, continues to raise awareness about the importance of cybersecurity across our Nation, ensuring that we all have the resources we need to be safer and more secure online. The overarching theme for Cybersecurity Awareness Month 2022 is “**See Yourself in Cyber. #BeCyberSmart.**”

The theme demonstrates that while cybersecurity may seem like a complex subject, it’s really all about people. This October we will focus on the “people” part of cybersecurity. This will ensure all individuals and organizations make smart decisions at home or at school - now and in the future. No matter your role as an individual or consumer, it’s important to take steps to protect your online information and privacy.

We encourage you to engage in this year’s efforts by creating your own cyber awareness campaigns and sharing the message with your peers.

4 Things You Can Do

Throughout October, CISA and NCA will highlight key action steps that everyone should take:

- Enable Multi-Factor Authentication
- Use Strong Passwords
- Recognize and Report Phishing
- Update Your Software

Review the **See Yourself in Cyber** tip sheets below:

- [Multi-factor Authentication](#)
- [Password Managers](#)
- [Software Updates](#)
- [Phishing](#)

The following resources will provide additional information and help you and your child(ren) stay safe online.

- [Common Sense Media](#)
- [NetSmartzkids.org](#)
- [Connect Safely](#)
- [iKeepSafe.org](#)

As our dependence on technology grows, and the threat of cyber attacks increases, we encourage you to set aside time to discuss the importance of creating greater security in our online world.

Sincerely,

Frisco ISD Technology & Media Services
