

KASSIE CROW

AGRICULTURE SCIENCE HORTICULTURE & VETERINARY TECHNOLOGIES

crowev@friscoisd.org | 469-633-6785 ext. 76785

Bio & Education

Agriculture has always been a part of my life but became a passion in my high school years. I received a Bachelors of Science from Sam Houston Sate University in May of 2003. After graduating I began to teach in Lumberton Texas, but instead of Agriculture I was teaching special education. After 2 years of teaching special education, I transferred to the high school in Lumberton and became an Agriculture teacher as well as a FFA Advisor. In the summer of 2007, I moved form Lumberton to Frisco and have fallen in love with the community and the work I have been doing. I am looking forward to working in Frisco and helping to build the Agriculture Science department and Horticulture classes.

Course Taught

I currently teach Landscape Design, Construction and Maintenance; Floral Design and Interior Landscape Development; Introduction to Horticulture; Advanced Floral Design and Veterinary Technologies Level 2

Activities/Hobbies

- Proud wife and mom of a beautiful little 3 year old girl
- Spending time with family and friends
- Landscape and garden my home
- Take pleasure in reading many great books
