

STAR TEACHERS

KRANTI SINGH

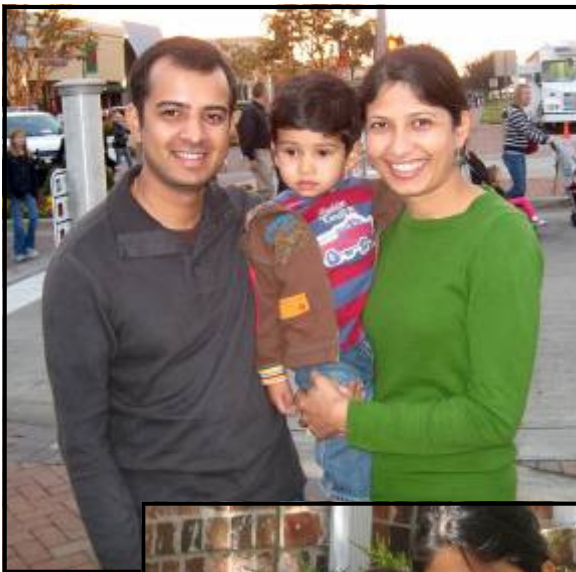

It is an honor to be a part of the teaching community at Fowler Middle School. I look forward to coming to work not only because I love teaching Science and Robotics, but also to make a positive influence on my students. I have been in the teaching profession for over five years. This is my third year teaching at Fowler Middle School prior to which I taught middle school Science and Robotics at The Rice School in Houston, Texas. I graduated Summa Cum Laude from the University of Houston with a Bachelor of Science degree in Interdisciplinary Studies. I was born and brought up in India and now live in Frisco along with my husband and son. When away from Fowler, I enjoy spending time with my family, traveling, cooking, and reading.

I have taught at Fowler Middle School since it opened in 2007 and this is my fifth year in education. Frisco, Texas has been my family's home for 18 years and it has been amazing to see the growth in our school district. I am very proud to be a part of the Fowler staff and it is truly a pleasure to come to work each day. I absolutely love the staff, students, and of course, our wonderful PTA!

I graduated from Louisiana Tech University in 1987 and I still love to visit my hometown, Ruston. I have two fabulous children, Casey (20 years old) and Bobby (17 years old). We enjoy going to watch the Dallas Cowboys play every Thanksgiving and we also enjoy spoiling our two Shih Tzu's, Holly and Dobber.

The most common question that I am asked is "How do you handle teaching middle school?". I don't know how to answer the question except by stating the simple truth—this is a unique period in a child's life because they are somewhere between a child and teenager, so it is exciting to play a role in their education. Also, the students help me remain youthful!
