### Bio & Education

I have always dreamed of sharing my love of science and discovery with others. Here at the CTE center, I am able to live this dream every day. Knowledge hungry pupils and the most supportive team a teacher could ask for make this the best place to be. To say the least, I love my job and have been blessed by it in so many ways.

I am a new teacher at FISD. I graduated December 2008 with a Bachelors of Science in Molecular and Cell Biology from Texas A&M University in College Station. I love learning, so I plan on getting my Masters in Molecular and Cell Biology in the future. My greatest desire is to prepare my students for their college careers and beyond.

### Course Taught

I currently teach Medical Microbiology.

My conference is 2<sup>nd</sup> period each day.

### Activities/Hobbies

- Horseback riding
- Painting
- Mountain biking
- Cooking. My specialty is pecan pie!
