

KEN STRONG

INTRODUCTION TO ENGINEERING DESIGN

PRINCIPLES OF ENGINEERING

Background Information

I began my teaching career in Cudahy, Wisconsin, where I taught machining and welding. I began teaching Project Lead the Way Pre-Engineering Classes in Waukesha, Wisconsin, because I wanted students to be able to get ahead start in their engineering future. Prior to teaching I spent 3 years in the United States Navy as a Machinist Mate aboard the USS Kitty Hawk. I received my BS in Technology Education from University of Wisconsin-Stout and my Masters in Education from University of Wisconsin-LaCrosse. I moved to Texas in the Summer of 2007 to escape the bitter cold winters of Wisconsin.

Courses

I am currently teaching the Project Lead the Way Pre-Engineering Courses; Introduction to Engineering Design and Civil Engineering and Architecture.

The Pre-Engineering Courses offered at the CTE Center offers students an in-depth, hands-on knowledge of engineering and technology-based careers.

Fun Facts about Mr. Strong

- I am a huge Green Bay Packers fan
- I am getting married this November
- I love to be outside on the lake wakeboarding and wake surfing
- I enjoy playing sports—I coached wrestling for 4 years while teaching in Wisconsin
