### Bio & Education

I have always enjoyed not only teaching school, but attending school as well. I received my BA in Mathematics at the University of Texas in Austin. Hook 'em horns! I also hold an MAT in Mathematics and Teaching from the University of Texas at Dallas. As a perpetual student, I am currently working toward a Masters degree in Educational Leadership from Lamar University. I am looking forward to graduating in December.

I began teaching in Carrollton-Farmers Branch ISD in 1995 at the campus I graduated from and where my father had also taught. From 1996-2000 I taught for the Highland Park School ISD. I joined Frisco ISD in 2000, teaching math at Frisco High School before helping to open Wakeland High School.

### Course Taught

For the 2009-2010 school year I teach both Precalculus and PreAp Precalculus. I am also the instructional coach and department chair for the mathematics department.

### Activities/Hobbies

I enjoy spending time with my family. I have two daughters that are also attending schools in Frisco ISD.

I love to watch sports on television, read a good book, or just spend time with friends.
