### Bio & Education

I always dreamed of becoming a teacher. I grew up in a household where education was very important. My grandfather was a teacher and administrator for over 25 years; my mom has been teaching for 20 years; my brother has been teaching for 5 years. In addition to these family members, I have numerous aunts and uncles that are also involved in education. These people have influenced me and helped me become the person that I am today. I can truly say that I am living out my dreams each day.

I am a proud graduate of Texas Tech University. I received my Bachelor degree in Multidisciplinary Science and Math Education. I taught in the Abilene, TX at Wylie High School for 3 years and then moved to the Frisco ISD in 2009. This will be my first year at Wakeland. I am excited to be a Wakeland Wolverine!

### Course Taught

A1: Geometry  
A2: Geometry  
A3: Conference  
A4: Geometry

B1: Geometry  
B2: TAKS Lab  
B3: Geometry  
B4: Conference

### Activities/Hobbies

- I love to cook
- I love to travel
- I love spending time with my family and friends
