

Things to Remember

When working with your child on a new skill or in a direct teach scenario, use the following strategies for success😊

1. Work slowly
2. Limited Vocabulary (one or two words)
3. Getting face to face with students
4. Explain what you are doing now
5. Explain what you are doing next
6. Give plenty of wait time- Remember the student's pace is different than yours. They need more processing time.
7. Be patient
8. **Let them do it**- Allow the student to do as much as they can independently, and then assist.
9. Never hand over hand. Always offer.
10. Have fun!
